The case against Microsoft is nothing more than a Clinton administration vendetta. The worst possible thing the Justice Department could do is breakup Microsoft. It is because of Mircosoft that I am able to send this E-mail. The Country is as far ahead in the computer world because of companies like Microsoft. The anti-trust suite was ridiculous and should have been thrown out the first day in court. The best one can say for Janet Reno and her case against Microsoft is she headed the Injustice Department. Long live Microsoft and what they have done for the computer industry.
